GENERAL INFORMATION

Masterlight products are designed and manufactured in compliance with the applicable normative documents. Dimensions in this catalogue are indicated in centimetres. In general, the lighting fixtures are prepared for a rated input voltage of 230VAC, 50/60Hz. Light sources are not included, unless indicated otherwise. For retro fit fixtures, a recommended light source is mentioned. In case of build-in led, characteristics of the light source are indicated in the specifications of each fixture. Effect finishes could show small differences in effect due to the handmade finishing process. Dimensions of the products could be subject to tolerances of +/- 1cm. As glass is produced by traditional craft techniques, its thickness, color and finishes are subject to variations, a feature that makes each piece unique. Masterlight reserves the right to make any technical or formal alterations to its products without giving prior notice, especially for led light sources.

For the duration of the warranty for all lighting fixtures we apply the legal warranty period, starting from the date of purchase, unless indicated otherwise. At fixtures with a led light source built-in, the warranty period on the led and led driver stands for a period of 5 years. The general terms and conditions are made available online, to review please visit masterlight.com or send a request to info@masterlight.com.
